IXM TOUCH™

AMAZINGLY STYLISH AND TOUGH

Equipped with incredibly durable Corning® Gorilla® Glass and built-in battery backup among its many revolutionary features, the TOUCH™ Series is convincingly an easy-to-use biometric device. Capacitive touch screen provides a splendid experience and it only takes a few seconds of interaction to realize the amount of thought and attention to detail that went into engineering this unique product. It's a perfect solution for a variety of Time & Attendance and Access Control deployments.

FEATURES AT A GLANCE

2.4" Capacitive Touch Screen

Android® 4.1.2 (Jelly Bean)

Wi-Fi

3 - hour Battery Back up

Corning® Gorilla® Glass

INVIXIUM

IXM SENSE™

TOTALLY EXTENSIBLE AND FLEXIBLE

Streamlined design of the SENSE™ Series conceals a tremendous amount of processing power and is engineered to be customizable and compatible with multiple biometric sensors to fulfill a broad array of market requirements. Its modular design will ensure this powerhouse device can be upgraded to future product innovations from Invixium. Exceptional features like Auto On™ and Anti-Shock Vandal Protection™ (ASVP™) make SENSE™ a unique product.

SENSE™ series is a suitable enterprise biometric product with numerous connectivity, usability and authentication options.

FEATURES AT A GLANCE

Auto On™ (Proximity Sensor)

Anti-Shock Vandal Protection™ (ASVP™)

Power over Ethernet

Upgradable
